

SECUREDET

PRODUCT DESCRIPTION

SECUREDET is a very effective, concentrated cleaner and sanitizer, for use in food processing facilities, where the use of a chlorinated product is undesirable, or protection of aluminum and soft metals is needed.

SECUREDET is excellent at removing fats, proteins and oils from all hard surfaces, and contains a high level of QAC to sanitise as it cleans.

SECUREDET is also suited for cleaning all exterior surfaces of trucks and the interior of refrigerated trailers, poultry and livestock trailers and bulk cartage units for product and foodstuffs, to help provide additional security to the food-chain.

FEATURES

- High, stable foam.
- Contains no caustics, metasilicates, ethanalamines or solvents.
- Cleans and sanitises in one step.
- Effective against both gram positive and gram-negative bacteria, moulds and fungi, at 1% v/v.
- Contains a high level of sequestrants and chelatants.
- Can be used via foam, spray, soak, scrub or mop methods.

BENEFITS

- Clings to vertical surfaces for longer.
- Safe on aluminum and most hard surfaces.
- Versatile "all in one" product that can be used in multiple ways for multiple tasks in food process cleaning.
- Proven sanitising ability with short contact time.
- Can be used in soft water, hard water and seawater. Keeps soil in suspension, and rinses easily.

APPROVALS / SUPPORTING DOCUMENTS (if applicable)

- MPI Approved C38 (All animal products except dairy).
- MPI Recognised for use in dairy processing.
- Independent Laboratory Efficacy Report

DIRECTIONS FOR USE

Do not mix **SECUREDET** with any other chemicals. Remove gross soil from surfaces before applying. **SECUREDET** can be diluted with either cold or hot water.

Food & Beverage Processing

- Foam applications - 0.75–2.0% v/v, dependent on soiling.
- Scrub, mop, or spray applications - 1.25–2.0% v/v, dependent on soiling.
- Heavy duty cleaning or soak applications - 3.0–5.0% v/v.
- For footbaths or boots and aprons where a cleaning action is required as well as sanitation – 1.0–2.0% v/v.
- Allow a contact time of 10-15 minutes, agitate surface where possible, then rinse off thoroughly with potable water, before production starts.

Refrigerated & Livestock Transport

- Use between 1.0-3.0% v/v (10-30mls/Ltr) dependent on soiling.
- Apply via venturi type foam gun or low-pressure sprayer and leave to dwell for at least 5 minutes.
- Agitate badly soiled areas with a brush if possible, before rinsing well with high-pressure water.
- Do not allow chemical to dry on the surface.

TYPICAL SPECIFICATIONS

Form:	Clear, slightly viscous liquid.
pH:	9-10
Specific Gravity:	1.04–1.05
Foam:	High

For detailed Safety, Handling, First Aid & Disposal Information, refer to the Safety Data Sheet for this product

IMPORTANT: READ BEFORE USE:

Use strictly in accordance with all safety, storage, handling and application instructions on the label, and in the manufacturers safety data sheet which is available on request. The manufacturer is not responsible for any loss or damage arising from failure to follow any of the safety, storage, handling and application instructions relevant to this product.
